Statistical Learning with Extreme Values

Presentation - Paper Reading Assignment

Adonis Jamal FirstName LastName

Sparse representation of multivariate extremes with applications to anomaly detection

Ecole Normale Supérieure Paris-Saclay - MVA

December 18th 2025

MATHÉMATIQUES
VISION
APPRENTISSAGE

Outline

1. Introduction
   - Context
   - Hypothesis
   - Objectives
2. State of the Art
3. Methodology
   - Part 1

Project Objectives

The project aims to

Literature Review

Our approach is based on [GSC17]

Method

Thank you for your attention

Bibliography I

[GSC17] Nicolas Goix, Anne Sabourin, and Stephan Clémençon. "Sparse representation of multivariate extremes with applications to anomaly detection". In: *Journal of Multivariate Analysis* 161 (2017), pp. 12–31. ISSN: 0047-259X. DOI: https://doi.org/10.1016/j.jmva.2017.06.010.
